Daniel.... Apologies for the late response.... EPA's current fuel consumption is approximately 100 gallons of diesel per day and it is being delivered to our ICP located at the Al Amin Shriner's facility in Corpus Christi.

thanks

All,

IMPORTANT QUESTION AND CALCULATION NEEDED

Due to fuel market uncertainties we are developing a fuel contingency plan. This requires defining fuel requirements.

Please survey only the Emergency Services: FEDERAL resources you are managing at DR 4332-Harvey-Texas and project with a start date of Monday, September 4 the following:

1. Unit/Agency
2. Fuel delivery location
3. Burn Rate per day: Gallons of Gasoline
4. Burn Rate per day: Gallons of Diesel
5. Burn Rate per day: Gallons of Aviation Fuel

It is critical I have these calculations by 07:00 Friday, September 1

Thank You

Dan
